

Airdrie Residential Clean Energy Improvement Program Upgrade Categories

Legend	
Renewable Energy	RE
Energy Efficiency	EE
Fuel Switching	FS

Upgrade Name	Upgrade Category
Solar PV System	RE
Solar thermal water heating	RE
Battery energy storage ¹	RE
High-efficiency central air conditioner	EE
High-efficiency gas furnace	EE
ECM motor for residential furnace	EE
High-efficiency gas boiler	EE
Air source heat pump	EE or FS
Heat recovery ventilation or energy recovery ventilation ²	EE
Ground source heat pump	EE or FS
Indoor lighting control	EE
Lighting fixture	EE
Drain water heat recovery	EE
Heat pump water heater	EE or FS
High-efficiency storage water heater	EE
Tankless gas water heater	EE
Attic insulation	EE
Wall insulation	EE
Foundation insulation	EE
Rim joist insulation	EE
Energy-efficient window	EE
Energy-efficient door	EE
Custom Upgrades ³	EE or FS or RE

¹ Only eligible when installed with a new grid-tied solar PV system

² Eligible if replacing an existing unit OR if required in projects that improve air tightness.

³ For residential upgrades that are not otherwise listed as an eligible upgrade and require custom design and sizing to fit the needs of the property. Eligible if permitted in the municipality's program, if they meet the eligibility requirements listed on the program website and, are approved by Alberta Municipalities and the municipality, on a case-by-case basis.
